

Car won't start on 4 occasions

Escrito por nickdepp - 27/06/2018 07:37

Hello,

Anyone had problems with the car starting? On 4 occasions now after a brief stop no more than an hour the car won't start. No ticking over or anything. I have to keep pressing the start stop button with my foot of the brake pedal to activate the fuel pump without starting the car. That's how it was explained on the first occasions the AA came out. I have a jaguar xer sport 180 diesel.

Any help will be appreciated.

I didn't find the right solution from the Internet.
