Hi,

BitTorrent causing bule Screen on diffrent times: some time I got the blusscareen after 1 min some time I got the blusscareen after 10 mins some time I got the blusscareen after 30 mins while if the program opened without downloading its never cause bule Screen. I have doubt that the issue from the Wireless card, so I up date it to leatet available driver and its the same. also i downgrade it from 7.7.2 to 7.7.0 and its the same?

Please help.

I didn't find the right solution from the Internet.
