

W-2 Forms - Housing Allowance

Escrito por MichaelSmith - 10/05/2018 13:16

Hi,

Our church pays two pastors, and in their payroll items I have a housing allowance item set up. For one pastor, the amount correctly reports on the W-2 form, however, for the other pastor the housing allowance amount showing up in box 14 is completely wrong. When I run various payroll reports, the amount for year 2010 housing allowances is correct, it's just not reporting correctly on one of the W-2's. In the payroll Item Descriptions...I have it set up as "Tax Options" Housing allowance.

Please help

I didn't find the right solution from the internet.
