hdcp or edid issue?
Escrito por HarryJenkins - 27/03/2018 12:13

_____

Hello,

I am continually having to try to sort out HDMI problems that seem to be either EDID or HDCP issues. Is it possible to determine which issue is causing the problem? I've seen and used some of the EDID emulators and recorders with mixed results but so far I haven't seen any fix for a HDCP problem. Any recommendations?

Please help.

I didn't find the right solution from the Internet.
