

after power cut black screen on monitor

Escrito por JensenBreck - 04/09/2017 09:11

Hello,

i have this problem: yesterday i was using my pc when sudden power cut happened, now today i try to turn on monitor and it showed weird screen, i restored to factory defaults on monitor that fixed the problem, but then i started pc and i got black screen it doesnt show "no signal" message.

I didn't find the right solution from the internet.
